DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kifer (US patent no. 5,863,092). Kifer discloses a portable device (14) for retaining filled plastic shopping bags (18), each having a pair of handle loops, in an upright position while being transported in an automobile comprising: a thin flat plate (14), a plurality of apertures (16) within the body of the thin flat plate, each of the apertures forming an upwardly vertical stalk (17), each of the upwardly vertical stalks providing an upright member upon which to releasably secure the handle loops of the filled plastic shopping bags; wherein the thin flat plate contains a solid unobstructed space on the outward surface and is capable of placement of advertising media.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kifer (US patent no. 5863,092) in view of Johnson (US publication no. 20040020507A1). Kifer

Art Unit: 3632

disclosed all the claimed features of applicant's invention except for the thin flat plate contains a plurality of longitudinal apertures a) each of the longitudinal apertures allowing an attachment point through which an attachment strap may be threaded thereby providing a means of releasably attaching the thin flat plate vertically to an automobile seat. Johnson teaches a portable device comprising a thin flat plate (15) contains a plurality of longitudinal apertures (24), each of the longitudinal apertures allowing an attachment point through which an attachment strap may be threaded thereby providing a means of releasably attaching the thin flat plate vertically to a back side of a seat (page 2, paragraph [0018]). It would have been obvious to one of ordinary skill in the art to have modify the plate of Kifer such that plurality of longitudinal apertures are provided to allow an attachment point through which an attachment strap may be threaded thereby providing a means of releasably attaching the thin flat plate vertically to a back side of a seat as taught to be desirable by Johnson.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The remaining prior art of record demonstrate similar bag holding plates. Mikus teaches providing advertisement on solid surface of a plastic bag holder (40, figure 4A).
